

Accessories from Tufvasson Tesch

Tufvasson Tesch offers over 2,500 transformers as well as accessories of various kinds. Contact us for further information about more accessories and guidance for the correct power supply.

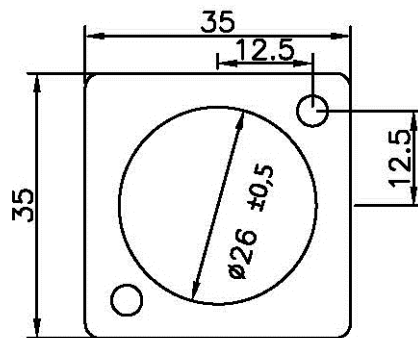

SELV socket for portable lighting systems

Tufvasson Tesch's SELV connectors (Safety Extra Low Voltage) is a reliable and versatile connector for larger conductors. It is used in installations with strict requirements on secure connections, e.g. for movable lighting installations. The connectors are designed for a current of up to 16A and are available for alternating current/ac (12V, 24V). The plug has a cable strain relief and is of course thoroughly tested and compliant with applicable requirements and EU standards (EN 61884-2-4).

Product	Type	Voltage	Current	weight
2820-3002	SVUA 12	12 Vac	max. 16A	20g
2820-3003	SVUA 24	24 Vac	max. 16A	20g
