

# Reliable isolation transformers from Tufvassons

Tufvassons have a wide range of transformers and over fifty years' experience of making them ourselves. We offer supreme quality isolation transformers for permanent installation, installation on DIN rails and movable variants that are connected by a mains lead. You can choose the product yourself, or ask our personnel to guide you to the right power supply.

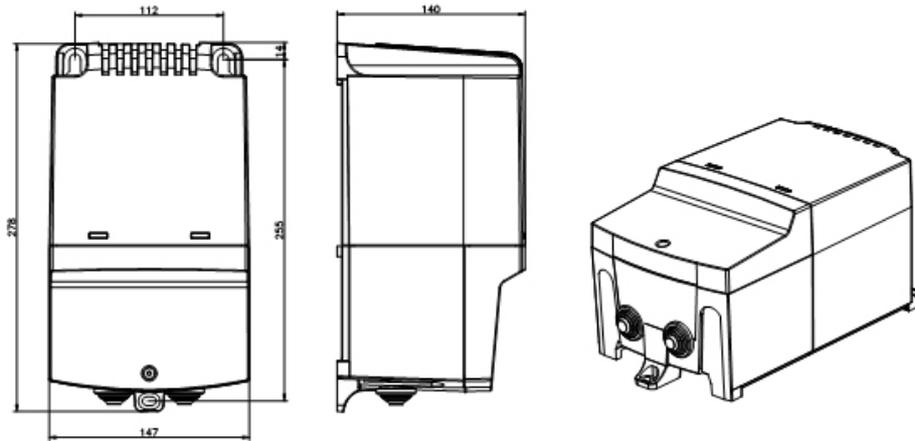

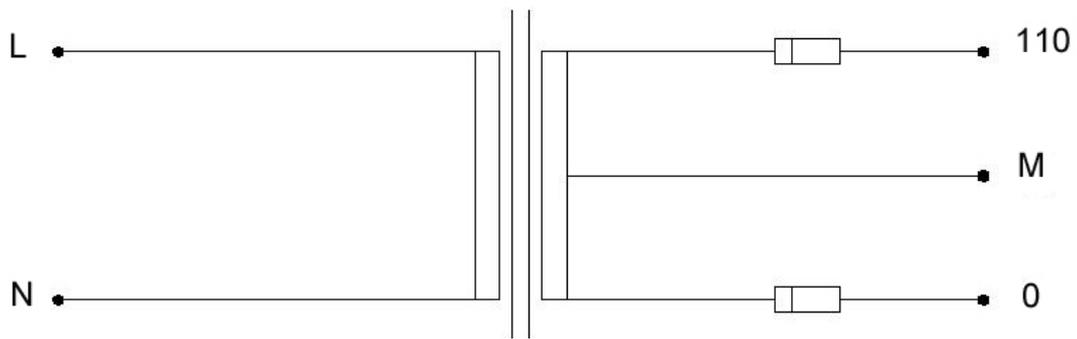

## Optimum isolation, removes interference

Isolation transformers are used when you need to adjust one voltage level to another, or separate protective earth from system earth. It offers optimum isolation, minimises interference and is easy to install and inspect. Just like Tufvassons' other products, the isolation transformer is CE marked and protected against short circuits and overloading.
